ACKNOWLEDGEMENTS

The production of this document is made possible through the assistance of a number of individuals and agencies.

The assistance of the administrators of many rural and urban municipalities is appreciated. The almost 500 municipally designated sites indicate the importance of heritage in these communities.

Permission has been provided by Mrs. G. Helen Mather to reproduce portions of Storey and Van Egmond architectural drawings. The drawings form part of the Alan Vanstone, Architect, Collection held by the Saskatchewan Archives Board.

INTRODUCTION

Since 1981, when *The Heritage Property Act* was passed by the provincial legislature, municipal councils and Indian Bands throughout Saskatchewan have passed bylaws officially designating various sites and structures as Municipal Heritage Property. These sites are among the most historically and architecturally important in their community. Likewise, the provincial government has designated some of the most provincially significant sites and structures as Provincial Heritage Property.

The majority of heritage sites in Saskatchewan are of local significance, and if you would like a certain building, structure or archaeological site officially designated, please contact your municipal/band administrator for details on how this can be achieved in your community. If you feel that the site is of major provincial importance, please contact the Heritage Branch at Saskatchewan Culture, Multiculturalism and Recreation to discuss the possibility of having the site designated as Provincial Heritage Property.

The following listing includes all sites formally designated as Municipal and Provincial Heritage Property, plus those in the process of designation, for which a Notice of Intention to Designate has been issued.

For further information about *The Heritage Property Act*, designation procedures and significance criteria, please contact:
